Summary

Software Developer with expertise in MERN/MEAN stack, specializing in scalable, secure, and high-performance web and mobile applications. Currently working as a Software Associate, I have hands-on experience in developing EHR solutions for the healthcare sector. With a strong foundation in service-based architectures, backend optimization, and real-time communication, I am passionate about emerging technologies and committed to building innovative, user-centric solutions that address real-world challenges.

Experience

Associate Software Developer

Aug 2024- Present

DEVLOGIX TECHNOLOGY PRIVATE LIMITED

- Contributed to Electronic Health Record (EHR) projects using the MERN stack, delivering scalable and user-friendly solutions while optimizing backend APIs for improved performance.
- Integrated REST APIs and GraphQL for efficient data communication with the backend.
- Developed dynamic database logic to support multi-tenant EHR systems, increasing scalability and operational efficiency.
- Built a real-time messaging system to facilitate seamless communication between patients and doctors, improving healthcare service delivery.

Freelance Full-Stack Developer

Jan 2024- Aug 2024

Remote

- Designed and developed custom web applications for small businesses, focusing on performance optimization and user experience.
- Integrated REST APIs and GraphQL for efficient data communication with the backend.
- Worked with startups to implement scalable backend solutions using Node.js and MongoDB.
- Created a visually engaging E-commerce website for clients, integrating dynamic elements with React.js and Material UI.

Skills

Languages C/C++, Javascript, Typescript

Frontend React.js, Angular, Next.js, React Native, Bootstrap, Material UI, React Router, React Navigation, React Native Paper

Backend Node.js, Express.js, Mongoose, Sequelize, JWT, Bcryptjs, Websockets

Databases MongoDB, MySQL

Tools Git, Postman, VScode, NPM, Vercel, Netlify, Docker

Projects

Electronic Health Records (EHR) System

React.js, Node.js, Express.js, MySQL

- Designed and developed a secure and scalable EHR system, ensuring efficient management of patient records and compliance with HIPAA regulations.
- Implemented role-based authentication for doctors, patients, and administrators, integrating JWT and OAuth2 for secure access control.
- Developed key features including appointment scheduling, real-time notifications, telemedicine support, and automated billing and insurance processing.

Image and Video sharing App

React Native, Node.js, Express.js, MongoDB

- Designed and built a fully operational social media app independently, allowing users to connect with each other and demonstrating comprehensive expertise in full-stack development.
- Utilized React, Redux Toolkit, Node.js, Express.js, and MongoDB to create a feature-rich platform for sharing photos and videos, ensuring a dynamic user interface, efficient server-side operations, and reliable data management.
- Enabled real-time communication through the integration of Socket.io, facilitating instant messaging.
- Successfully implemented secure user authentication with JWT and persistent local data storage using AsyncStorage.

Education

7.9/10 **Master of Computer Application**, AKTU University | Lucknow, India

2022-24

7.9/10 **Bachelor of Computer Application**, MCRP University | Bhopal, India

2019-22

Certificates

2024 **Frontend Developer(React)**, HackerRank

India

2024 **Javascript**, HackerRank

India

2022 **Java Basics**, HackerRank

India

2023 **React Js**, Great Learning

India
